DEPARTMENT OF ENVIRONMENTAL SCIENCE

Avni- Celebration of Earth Day'17.

Year	Date & Time	Department	Title of the Seminar/ Webinar/ Workshop/ Conference	Invited Speakers/ Resource Persons	Institutional Affiliation of Invited Speakers/ Resource Persons	No. Of Participants	Institutional Affiliation of Participants
2017	21st April, 2017	EVS	Environment from a Social Perspective	Ms. Pooja Sharma	Associate Professor, Department of Energy Studies, Jawaharlal Nehru University	60	Motilal Nehru College (Evening)

The Department of EVS organized 'Avni' on 21st April, 2017 to celebrate the 'Earth Day' that falls on 22nd April. The theme for Earth Day 2017 was "sustainable earth". This was a college level event bringing together all the students and concerned teachers to understand and address the global and local environmental issues. On this day, several activities like a special lecture, documentary, quiz competition, and knowing your campus were held.

Our invited speaker, Ms. Pooja Sharma from Department of Energy Studies, Jawaharlal Nehru University (JNU) delivered a lecture on 'Urbanization and Air Quality: Challenges and Solutions'. The detrimental effects of urbanization were highlighted using comparative case studies of Delhi and Kolkata. The impact on air quality in both the cities was highlighted. A strong relationship between population growth, urbanization and air pollution was shown. It was also pointed out that urbanization is not only associated with outdoor air pollution (on the account of use of various electronic devices, appliances, paints, furniture etc.) but indoor pollution is also increasingly seen as an important factor.

A short documentary, 'Earth Matters: Natural Disaster' directed by Mike Pandey was shown to the audience. The main aim of this documentary was to increase awareness about natural disasters and its management. This documentary increased awareness about the important anthropogenic factors that increase the likelihood of a disaster such as cutting trees,

construction of a dam, infrastructure development in a fragile environment, unsustainable developmental work in hilly areas, etc.

The campus trail involved making students aware of the ecosystem of college, rainwater harvesting system, different types of plants and their importance. Information regarding biodegradable and non-biodegradable waste and compost within the campus was given to the students. Students were also made aware about the wastage of paper, water and light during campus trail. Students were amazed to watch the numerous birds, insects, butterfly, squirrels and other fauna within the campus. It was a small initiative to tell the student as to how to maintain your college campus green and pollution free. Students were really interested and shared their experiences of the different green initiatives taken by some other colleges and NGOs. They even suggested starting an Eco-club. A Quiz Competition was also organized to assess and increase student's interest in environmental studies.

PRINCIPAL DR. S.K. SHARMA welcoming Invited Speaker DR. POOJA SHARMA.
